

I use XM radio weather and traffic reports every day. They differ somewhat from the local traffic reports. Having two sources allows me to evaluate both and be better informed on the route needed. The XM report is a continuous report. the local reports usually report every 10 or 15 minutes. Sometimes that isn't enough or isn't timely when a quick decision has to be made. XM radio is a service for which we pay. What is the advantage of taking this much needed and appreciated aspect of the service away? Please reject the NAB's petition 04-160.

Respectfully,

Ren?e Grannis
